

ABOUT OUR DIGITAL MARKETING AUDIT

You want to understand how your **social media and digital marketing** is performing – that means everything from **Twitter** to your **website** and email **marketing**. You want to understand the things that are working well... and not so well. Areas for improvement in terms of **optimisation, messaging, structure and engagement**. Disconnects with your **strategic plan**... as well as **performance in terms of target audiences and objectives**. You want to understand areas of risk in terms of processes, the law and governance, as well as skills gaps within your delivery team. But most importantly you want a clear, structured list of things to work through, at the end, which will give you a roadmap for improvement. Don't you?

Yes? Then you've come to the right agency.

Our Digital Marketing Audit is an exhaustive study on anything you're doing online and via email. We apply a variety of research methods to highlight areas of poor (and great) performance, as well as report on results and conversion levels. We present our findings on the opportunities, risks and suggest practical ways to get things going even better.
